LONGSHOT BOOM

EXTENDS SPRAY COVERAGE TO 52 FEET

Norstar's fully integrated Longshot Boom nearly doubles the truck's reach while retaining the reliability and effectiveness of the core Chemical Injection System.

DURABILITY

We designed our first Longshot Boom over 30 years ago with durability in mind. It's made of steel so it can take a punch without cracking or failing and includes break-away protection.

REACH

The articulated arm reaches even the most challenging zones, allowing you to maneuver the sprayhead virtually anywhere it needs to go.

EASY TO USE

The Longshot Boom is operated independently with its own easy-to-use in-cab joystick. When not in use, the Longshot Boom tucks safely inside the width of the truck.

THE SMART SOLUTION

“WE HAVE OVER 600 MILES OF VERY DIFFICULT TERRAIN, SOME OF WHICH IS IMPOSSIBLE TO REACH WITH STANDARD SPRAY EQUIPMENT. THE NORSTAR LONGSHOT BOOM ANSWERED OUR NEEDS AND ALLOWED US COMPLETE COVERAGE.”

*- Joseph Kates, Fleet Maintenance Supervisor,
Central Arizona Project*

ACROSS THE CANAL SOLUTION

The Longshot Boom reaches an impressive 52 feet, spanning canals, drains, and other water obstacles, while protecting vulnerable vegetation areas.

UNDER THE BRIDGE SOLUTION

Norstar engineers designed the Longshot Boom to overcome even the most difficult terrain challenges. All hydraulic controls mean there are no sprockets, pulleys, chains, or cables to complicate the operation.

HIGH BANK SOLUTION

The Longshot Boom is the most important tool you will have for achieving continuous coverage in tough-to-reach areas.
